SAFE

The EHS Management Solutions

ASK Environment-Health-Safety

SAFE is a web based application, designed to provide flexible solution for your organization to manage EHS. It provides prompt solutions to derive continual improvement in EHS performance with user friendly interface.

The Software offers various options to suit the unique demand of your organization. Whether you're running a small business, a large corporation, or at the helm of a multinational, SAFE can be tailored to suit your requirements. The solution is very cost affective for small organizations, as, you can select modules suiting your requirements. Equally, larger, more complex corporations enjoy the synergistic benefits of using a wider range of EHS modules across a number of locations.

Maximize ROI, Save Time, Enjoy Peace & Confidence on EHS front

- ✓ Are you facing difficulty to manage Accident/Incident History?
- ✓ Do you wish to analyze your Accident/Incident records to generate reports indicating trends?

- ✓ Do you have any difficulty to keep track of legal documents renewal and want to save time of creating legal compliance reporting?
- ✓ Do you have any difficulty in planning and tracking EHS Training records?
- ✓ Are you fed up with managing sampling data to comply with Environment norms?
- ✓ Do you have any difficulty to track corrective action?
- ✓ Is your time wasted in designing cumbersome excel files, charts and cumulative reports?
- ✓ Are you facing difficulty to manage your schedules?
- ✓ Do you want to manage Inventory of your PPE, Medical center medicines?

If, answer to all the above questions or any one of them is YES, then we have solution-SAFE

Environment - Health - Safety

ASK-EHS Engineering & Consultants Pvt. Ltd.

Domain Features

- Evaluate organization's safety performance in an instant
  Transparent view of organization safety performance considering analysis on Accident/Incident/Near-miss, Trainings, Audit results, Observations, Drills, Tool box meetings etc…
- Comply with OSHA and Government regulations
  Achieve and exceed regulatory compliance for OSHA, OHSAS 18001 and Government regulations. Software prepares 300, 300A and 301 reports periodically
- Record total man hours and man power detail and generate project overall performance report
- Task management and Notifications
  Effective EHS demands a proactive approach to issues. Each module within software allows you to create actions, and delegate them to the person responsible. Software then automatically shows users the actions they've been given, and reminds them of incomplete tasks

  Automate the process of generating report for overdue tasks and alerting employees with notifications by escalating email to individual employees, workgroups, departments
- Streamline your safety processes and eliminate duplicate data
- Reduce incidents and save time, money and resources
- Organize schedule, store & track record and define action of your safety program to derive result
- Reward and violation scoreboard for employee, contractor and project site
- Audits and Inspections management
- Identification of safety hazards and risk assessment
- Store, track and manage permit record and maintain status
- Key Performance Indicators (KPI)
  Track performance of your organization based on personalized Performance Indicators
- Heinrich Law
  In a workplace, for every accident that causes a major injury, there are 29 accidents that cause minor injuries and 300 accidents that cause no injuries
- Contractor / Department performance indicator
- Enriched with library of standard Jobs, its hazards, control measures & consequence
- History of system data for future internal and external audit
- Risk Calculator
- Personalize rule engine
  Create your own rules to get alerts for incidents, safety violation, legal documents etc.
