

Fingkey Hamster-II

Fingkey Hamster II has a fingerprint sensing function and is a cutting-edge fingerprint sensor that prevents use of fake fingerprints. It can be connected to PC along with a normal mouse and used for all the areas involving passwords and will be a competent security gadget without having to use a password, which is often hard to remember and misused by unauthorized persons.

Applications

- Security for computer and network
- E-commerce
- Security for banking and financial institutes for user authentication
- Medical information system
- Other fields requiring user authentication (SSO, CRM, Electronic payment and etc)

Features

- It perfectly verifies the authorized user with its fake fingerprint identification function.
- It makes accurate user identification with its excellent algorithm technology and accuracy.
- It is well designed for convenient use.
- It has high durability that ensures robustness.
- It ensures speedy verification.
- Dry fingers are also well sensed.
- It can be used in various client/server and Internet environments as well as for computer security

Functions:

- Live Finger Detection
- Auto-on
- USB 2.0 Full Speed / High Speed
- Multi Device
- CC(Common Criteria)

Technical Specification

Interface	USB 2.0 (Full Speed / High Speed)
Fingerprint Sensor	25.3(W) x 40.7(L) x 67.7(H) mm
Scanner Resolution	500 dpi
Size	61(W) x 80(L) x 47(H) (mm)
Operating Temperature	0° to 40°C
Supported Operating Systems	Windows 98SE / ME / 2000 / XP / 2003
Certifications	MIC, CE, FCC,WHO
Voltage	DC 5 [V]
