

USB GPRS Modem

USB GPRS Modem delivers all the power of instant wireless connectivity to your multiple applications. Because the modem is fully type approved, it can dramatically speed up the time to market with SMS features. Dual Band Modem with open interfaces and AT commands can embed and run your applications very efficiently. With its proven technology, the modem can be relied on for enduring and dependable performance.

FEATURES:

Dual Band modem designed for M2M and automotive applications and Internet surfing. Internet connectivity with 115 Kbps.

- USB Quad Band GSM/GPRS modem (module) for data and SMS service.
- Dual-band 900/1800MHZ
- Wireless access to internet
- Double tone multi- frequency function (DTMF)
- Standard USB interface
- 3V movable SIM slot
- Maximum transmitting speed 115KBps
- Foldable and turn able antenna with high sensitivity

GPS Specifications:

FEATURES	VALUES
Working Frequency	900/1800MHZ
Transmission Power	33dBm +/-2dBm.
Receiving Sensitivity	-102dBm.
Working Temperature	-20C to 55 C.
Storage Temperature	-40C to 70 C.
Dimensions	75*45*15mm
Input Voltage	5V
Input Current	1-2A.
Standby Current	5mA.
Working Current	100-140mA.
Interface	USB
Interface Rate	300 to 115,200 bits/s.
Power Supply	5V.
Size:	82*43.8*18mm
Weight	30gm
