

E-LEARNING

Progressive eLearning Programs for
a Renowned Metal Producer

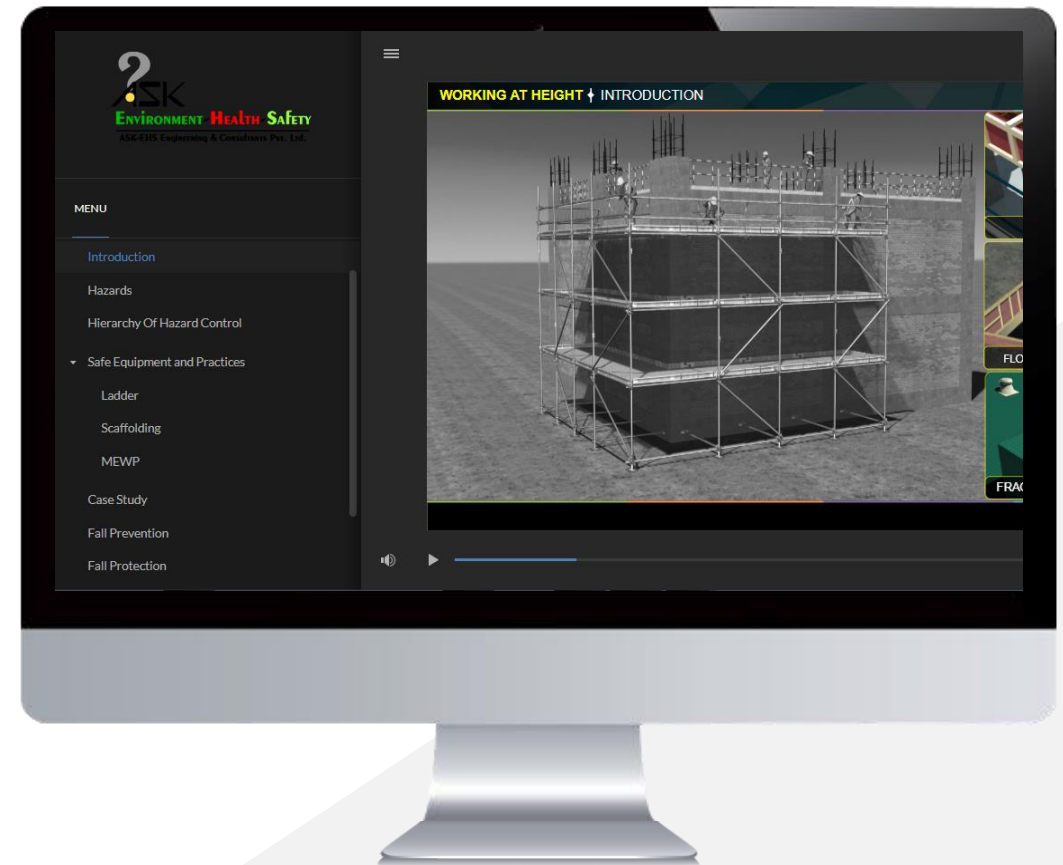

CUSTOMIZED E-LEARNING PROGRAMS

Prospecting Stability in a Remote Environment

Stay Vigilant | Prepared | Aware

Client was hunting for a solution that would be in line to their training objectives. With the vision of digitizing the bulk of their training methods, they wanted to employ the services of a training provider that would host training programs but and provide comprehensive insights on the progress of the learners

PRIMARY INTENT

- Host Training modules that comprehensively cover the subject
- Contain easy & convenient course navigations
- Provide information over the course status (to the learner individually & the administrator for all the learners)

SHORTLISTED APPLICATIONS

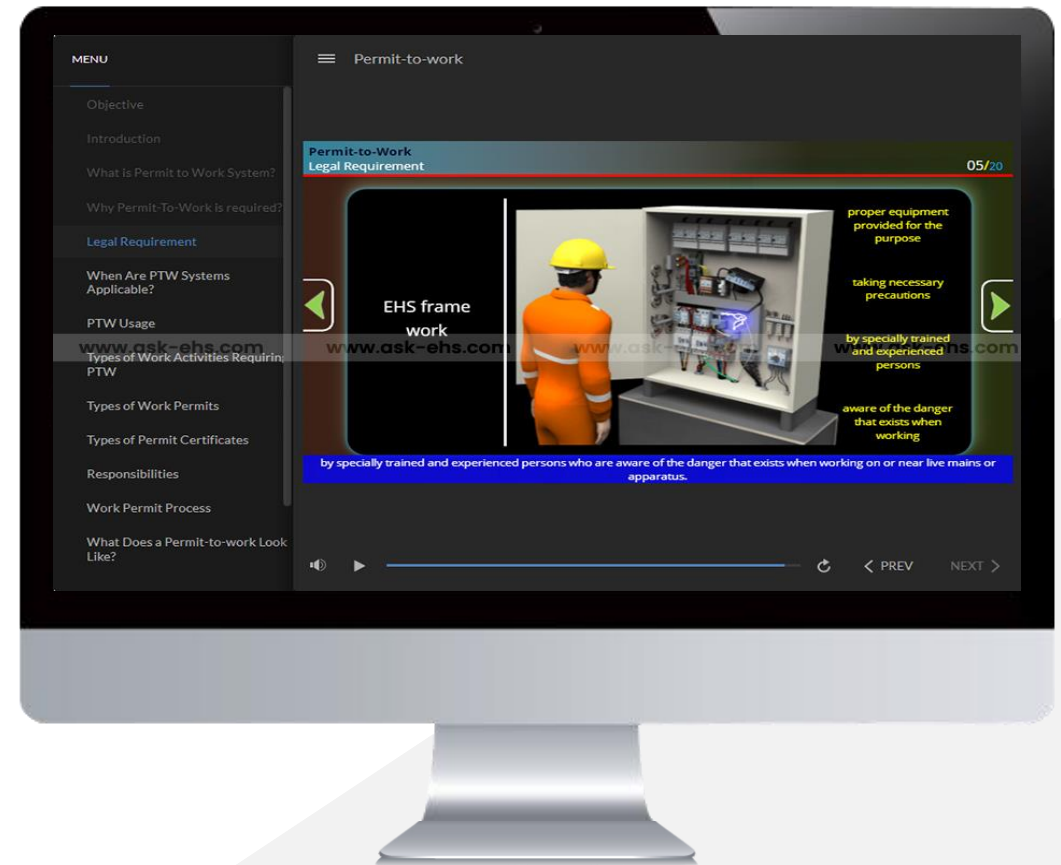

- Work at Height Standard (Fall Prevention)
- Confined Space Entry
- Electrical Safety
- LOTOTO (Isolation)
- Machine Guarding
- Defensive Driving

ATTAIN LEARNING EFFICIENCY

- Having previously attained animation & training services from ASK-EHS, the client was aware of our domain expertise & eLearning services.
- The animated movies were a great medium of training as they were perceived with high attentiveness & maximum retention of information.
- The on-site training collaterals were designed as per the worker's capability & merit.

ASK-EHS SOLUTION DELIVERY

- Number of all registered users (with active and inactive status)
- Total number of course assignments to any active or inactive user
- All courses with completed or incomplete status from any active or inactive user

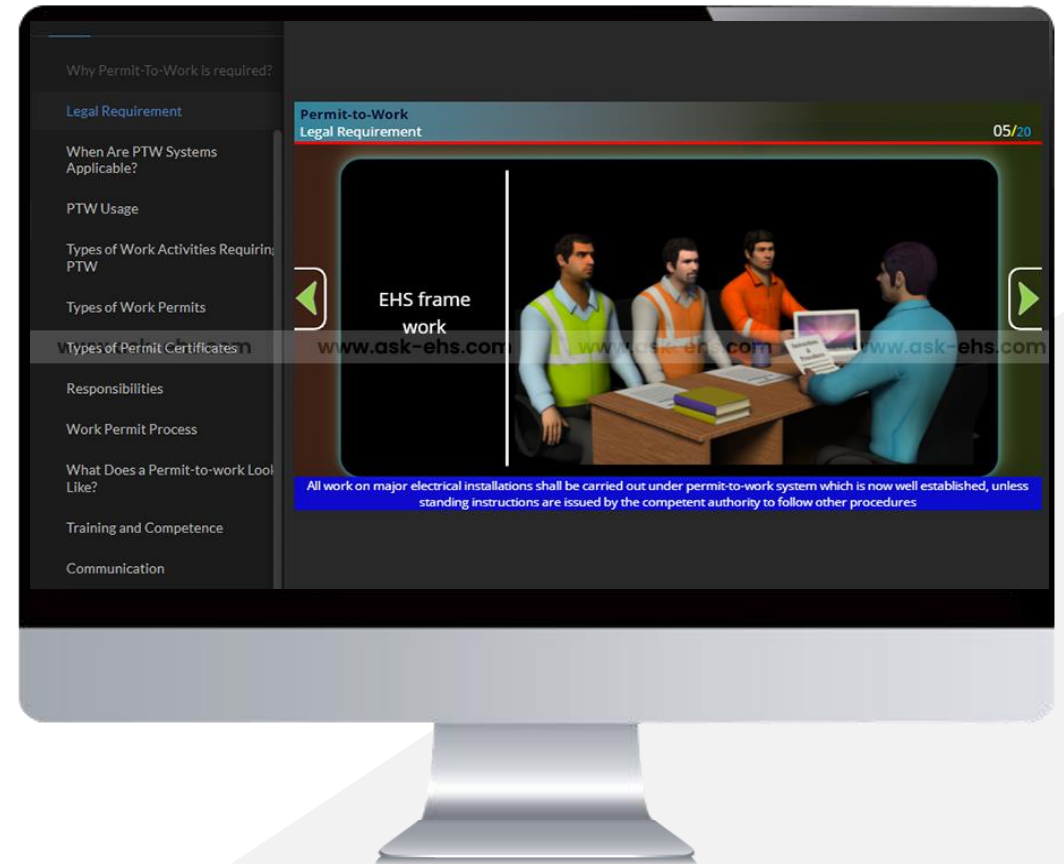

KEY FEATURES

- Total time spent in active courses from both active and inactive users
- Badges earned by the active course users
- No. of users passed or failed. The option to download the report in an excel format

COMPREHENSIVE MICRO STATISTICS DELIVERY

- User attention increased by 88%
- Easy to understand course navigations led to confusion free learning
- Extensive use of animation ensured better understanding
- The learner as well as the admin panel were convenient & provided with the detailed insights that were expected. This functionality lacked in their previous service provider

COMPREHENSIVE MICRO STATISTICS DELIVERY

- The assessment result showed 90% increase in the retention rate
- The module surpassed their expectations.
- Not only did it help them achieve their primary objective of training their contractor workforces, but also laid a solid platform for their future training strategies.
